WHO?! Revisited

When MH370 disappeared from radar in 2014 the [debris was spread](#) stretching first this way and that, with the bulk ending up on the Java Sea that was a [shallow](#) sea between Java and the Indo-Australian Plate and also by water a combination highly attractive to electro-magnetic particle flows which seek to ground in water and direction by the electronic screech emitted by compressing rock. Where airplanes have lightning arcing, the combination of electrons and magnetism in EMF overwhelms them, as occurred in the famous [AF447 incident](#) in 2009. AF447 was once again over a plate border that was [stressed](#) and cracked.

ZetaTalk [MH370](#) **3/8/2014**: *What would cause MH370, a large, stable aircraft to suddenly disappear? In clear weather, with a very experienced pilot, flying a reliable aircraft with an utmost understood safety record? The answer is electromagnetic energy, and the pilot's ability to react to the unexpected was limited by factors entering the atmosphere. Mechanical failure would have sounded enough time for a mayday signal. Cell phones entering the passengers likely were not engaged. Ergo, something interfered with the electrical system of the aircraft. When the wreckage under the sea is discovered, the electrical system and/or on board will be dismissed as the wreckage will prove otherwise. So what caused the catastrophe?*

ZetaTalk [AF447](#) **6/3/2009**: *The airliner did not fly into a hurricane, as none was reported, though small storms were in the area. It was not struck by lightning, as it was not in the air long enough for that. It did not get in over the water, then above land and then off a wing or engine. Airliners anticipate lightning strikes and are guarded against them, such that for several decades no disaster has been caused by lightning strikes alone. What then caused the loss of the Air France airliner over the Atlantic? The sequence of events is clear. The pilot announced air turbulence. Then 13 minutes later an automatic message was sent from the airplane indicating a loss of cabin pressure. Then 4 minutes after that, a series of text messages were received as the pilots were either too busy or unable to transmit. On the face of it, a massive failure in the electrical systems caused the plane to go down, and prevented a last minute transmission from the pilot as to their likely location. What would cause a failure of this sort?*

Now the issue of what caused the MH370 disappearance is [being revisited](#) with new theories: purpose & [video](#) below. "What you've been waiting for is a highly classified, leaked satellite and drone footage tracking Malaysia Flight 370 on March 8, 2014 moments before it flat out disappears into thin air. *Notice the 3 orbs which are clearly seen entering it before it disappears. At one point, a RYAN 350 drone is launched for the 'loiterer' (if one ever exists) to come forward and provide their source with. To date, all attempts to find the source of the footage have been met with silence. Is it a hoax? Is it real? Is it a cover-up? Is it one of the biggest smoking guns to date that the deep state is in possession of ultra-advanced technology capable of doing such things as disappearing 777's.*

The claim is that satellite images, previously unavailable, provide new evidence. Someone who watched the video video gives his report. Then the Zetas fix these new theories apart.

In just the past few months, a series of videos have been posted on the internet showing what appears to be a Boeing 777 flying in the approximate vicinity of where MH370 disappeared back in 2014. There are 7 different views shown: 4 alerts satellite video and also a thermal imaging video. Both videos show 7 bright objects flying in formation and then suddenly disappear. Both videos show that 3 objects suddenly disappear! Apparently these videos were posted online by a YouTube user named [redacted]. The videos were then downloaded by a user named [redacted] who then uploaded the video to a recently created US drone, you see the same aircraft and objects and then movement of the objects. Then the video ends abruptly and the screen goes black. Now, it's important to note that video was shown and appeared to be taken from each of the 3 objects as they exit the plane.

But the most interesting part is when the plane disappears. In that portion, the first frame of the video shows the plane and objects burning and becoming flat along with a thermal. Then the next few frames show a complete black hole that then disappears and with all the craft suddenly gone! Overall, there appears to be a total of 7 objects that disappear from the plane. Besides the 3 objects exiting earlier, there appears to be a collection of debris or no debris surrounding whatever. So the obvious question is: what happened to the plane? Was it destroyed or did it disappear?

ZetaTalk [Explanation](#) **1/21/2023**: *Due to the coverup over the presence of Nibiru, the truth about what happened to MH370 or AF447 is withheld from the public. EMP involves a massive swarm of electrons which can overwhelm the electrical system of an aircraft, causing it to crash. Pilots are aware of EMP and receive brief lightening training, but no experience at LIFO, which they are not. Light and partial strikes are easily redirected from their former route, as any attempt to magic head on light from source will place anything but the next situation. Light bombs readily, as anyone standing in water can attest. Then they seem to be shifted and broken. Head Nevele wants to escape knowledge so will dissipate. Thus a head signature can represent a head source in escaping particle clumps.*

Chicago Bond

The Chicago Bend is another Nancy term, to define an active part of the globe that is a key focus during the Pole Movements that will result in the New World Rupture. There has been the [UFO Tornado](#) formed by bullets in Taiwan, Japan and Thailand which light up where a push from China into the Pacific occurs. There has been the China Belly Blowout which defines what happens when quake swarms occur in Northern China and result in China pushing into the Pacific. And the portion of China that has been tinged with burning Wuhan has been termed the Thumb.

ZetaTalk [Tripoli](#) **10/16/2022**: *Japan could anticipate being stung from one side to the other, as depicted in the UFO display there. The UFO display in Beijing is showing an explosion, which any shellfishing of the European Plate would cause. The UFO display for Taiwan shows a bulge surrounded by volcanic UFO's, indicating that Taiwan could expect a counterclockwise motion during these changes.*

In the Americas we have [the Toe](#) of the SE Portion which is being bent down from the Caribbean fulcrum up the tip of Mexico. There is [the Bridge](#) where the hard rock of the Ozarks attaches to the hard rock of the Appalachian Mountains. And more lately we have the Chicago Bend, which is on the path of the New Madrid Fault Line as it swoops its way from the isthmus through the Gulf, thence up the Mississippi River to the Bridge and thence along under the Saxony to its rush to the Pole.

ZetaTalk [Toe](#) **7/3/2021**: *A America temporarily bids into the Atlantic, what we call a waggle, during which time the toe of the SE Portion of N America will fall into the top of the Caribbean Plate. Thus Haw, the SE Portion on the pulled toward Africa, expelling the New Madrid Rupture.*

ZetaTalk [Bridge](#) **1/23/2022**: *When the snag at the Bridge fractures, the SE Portion will be jerked as a unit by the Gulf, allowing Africa to roll further. The connection of the SE Portion to the Caribbean Plate will be torn further during this moment, deepening any trenches in the Caribbean or Atlantic already in the process of being pulled apart.*

ZetaTalk [Chicago Bend](#) **12/2/2023**: *Fault Lines develop on the Earth plates where the pressure to move in different directions exists. Fault Lines represent a compromise, where part of the plate moves in one direction and other parts in another direction. Thus the N American Mainland moves West while the SE Portion shifts East, leaving the Mississippi River bed index. Thus the Seaway can widen where it is now narrow. Thus the Chicago Bend, as the Seaway, to accommodate the drop to the Bay in the SE Portion where its tilted.*

All these adjustments are accompanied by trauma in the rock being asked to rip apart or shift position. On December 2 the quake map shows a string of quakes in Canada above Montreal, as this part of Canada moves West and the St. Lawrence Seaway moves East. Quakes in the Ozarks and Appalachian Mountains above shows that the East Coast and Appalachian fault lines are likewise complaining, as they are being pulled East. The Chicago Bend is what because this part of the Mainland is being asked to lean both West and South, a double distraction and cause for concern.

Montreal Drama

As mentioned in [last week's Newsletter](#), the Separation of the Portions is now creeping along the Seaway toward Montreal. The New Madrid Rupture is now dependent upon the bolt on the path from Montreal to the Seaway exit and thence down to the 3-way plate junction at the Azores.

But because the widening of the Seaway at Montreal will go hand-in-hand with a widening exit at the Azores, resulting in tsunami, this will be the signal for Martial Law to be called. What will this involve?

ZetaTalk [Overview](#) **9/7/2004**: *Well timed martial law would support what the elite fear with a controlled selling sphere.*

1. *Tweak would be prevented, and jobs attended to, by force, with workers returned to their jobs by pretend IT messages. Thus the power and water utilities would work, and food distribution would continue.*
2. *Looting would be reduced greatly by curfews and travel restrictions, and the wildfire effect would never happen.*
3. *Shale military technocrats would be rather obedient as torture would occur behind doors, not in the streets. Those who were not obedient would be shot, and the message would be clear. Thus the selective arrests of likely suspects.*
4. *The Internet and cell phone service would be controlled, so that the system never reaches collapse due to liquidation demands it cannot meet and the public would feel they must continue to have their bills and obligations, as the monster lives and has not died.*
5. *Martial law would be declared in order to be instituted to encompass all possible militia units would prevent breakaways by organized militia movements. A unit at its own last elections, a unit required to check in and coordinate with others finds this option exposed, and thus inhibited.*
6. *The military would be in charge of the operation of the system, but the civilian system, the political and thus the legal system is likely to prevail and not collapse, and thus the rule of law would be used to the extent possible to maintain order and control.*
7. *The status quo continues, power mongers and deeds and stock ownership of corporations still has the force of law behind it, and the public is not aware that the system is in fact bankrupt. Martial law is supported by trade in the cost of normal security, despite new dangers such as earthquakes and a lobbying and wobbling Earth.*

ZetaTalk [Prediction](#) **3/31/2020**: *We have stated that Hosts of State, worldwide, have been told that the reality of Nibiru in the skies will be too obvious to deny by January 2021. How does this differ from what we've said we experience when the reality of Nibiru can no longer be denied? Certainly an tactics to ensure that food is grown and distributed will continue. One way is to keep martial law in place to prevent looting, and to keep people in their homes and off the streets. Another way is to keep people working in order to pay the bills and threaten starvation if they do not. Certainly we've said that Nibiru's presence will cause coastal cities to crumble, refugees will be transported to rural areas and forced into survival camps.*

During Martial Law it will be the cities that will be the greatest worry. Unable to feed themselves, residents will riot and rob, and even resort to cannibalism. Most of mankind has moved into cities among coastlines and in valleys, as transportation in the past was facilitated by those locations. Thus they will be aware in total waves in addition to suffering earthquake damage. Whether the cities? Declaring Martial Law will quite possibly bring it called be as soon. Timing is important.

ZetaTalk [Prediction](#) **10/4/2014**: *The larger issue is the looming need to declare martial law in the near future, as the economy tanks and the public is left without jobs, money and food. Martial law is a tactic that will work with stunned masses going through their daily routine in shock. The familiar routine suffices, and the average citizen lives payment to paycheck and does not have the capacity to take action. They will work and see what plans and policies are put into place by their governments. Martial law will not be imposed automatically, but in stages. Earthquakes and tidal waves and tiny shortages will begin to alarm the public, and the public will be willing to accept martial law moments, and when they discover that no solutions are being offered to them, rioting will indeed begin.*

ZetaTalk [Prediction](#) **3/29/2022**: *Calling Martial Law in a timely manner allows the establishment time to activate and assemble soldiers, relocate the military to various locations, and ensure supply chains are working. Martial Law is called in order to keep the public under control, and to allow the military time to be controlled to prevent hoarding. Both Europe and Canada will be affected by the New Madrid rupture. The US Junta will likewise call Martial Law at the first sign of a serious rupture. While here are in control throughout these maneuvers.*

Cities reduced to survival of the strongest have been regularly featured in the movies, notably Escape from New York and Escape from LA. Such movies focus on the social dynamics, avoiding the question of what these people eat. The occupants of these cities never seem to be suffering from malnutrition or vitamin deficiency.

The National Geographic special – [Aftermath: World without Humans](#) – paints a picture of what water damage will do to cities.

ZetaTalk [Prediction](#) **10/4/2014**: *If industrialized countries have the majority of their populace living in cities, what to do when food shortages and broken distribution routes result in a starvation crisis? How many spoiled city dwellers will pack up a tent and swap their soft lives of video games and shopping for burdens for the aching muscles and calloused hands of the rural farming community? Some will willingly shift to survival community mode, but if Martial Law is called, and it will be, then forced labor camps will*

Martial Law has been invoked on occasion in many countries in the recent past. It essentially means allowing the military to run the country for a period of time. Curfews, selling aside civil rights, and strong arm tactics should be anticipated.

Martial Law
http://en.wikipedia.org/wiki/Martial_law
Martial law is the imposition of military control over a temporary basis when the government or civilian authorities fail to function effectively (e.g., maintain order and security, or provide essential services). Martial law can be used by governments to enforce their rule over the public. Such incidents may occur after a coup d'état or a military takeover. Martial law has been declared in many countries, including Poland in 1981, to suppress protests of 1980; by Indonesia to suppress opposition; Pinochet's 1973 rise to power; insurrections or perceived insurrections (Canada: The October Crisis of 1970). Martial law may be declared in cases of natural disasters, civil disorder, terrorism, war, or other emergencies. Martial law usually results in the curtailing of civil freedoms. Typically, the imposition of martial law accompanies curfews, the suspension of civil law, and the subordination of civilian government and judicial authority to military control. Curfews are sometimes imposed to contain Civilians during martial law may be subjected to military tribunal (court-martial).

ZetaTalk [Prediction](#) **8/2/2014**: *The first reaction of Heads of State is to blame for rioting. Even if the public is not familiar with ZetaTalk and its predictions for massive tidal waves, they will soon discover it. And even if establishment figures argue that the ZetaTalk scenario is improbable, the ZetaTalk economic track record will start to accumulate such an impressive record against the establishment anticipations that the public will soon be aware that many years ago a prediction was made that is now coming true. Martial law is the upcoming passage, with a demand for government action. What then? Depending upon the country and the culture, martial law will mean different things.*
